

VOLUME - II ***DESIGN REPORT***

CONTENTS

Chap -ter No.	Section	Title	Page No.
1.		Introduction	1 – 2
	1.1	Road Network in Nanded City	1
	1.2	Existing Road Condition	1
	1.3	Objective	1
	1.4	Report Structure	1
2.		Design Standards	1-17
	2.1	General	1
	2.2	Design Codes & Standards for Urban/Rural Roads	1
	2.3	Geometric Design Standards	1
	2.4	Pavement Design Procedure & Methodology	2
	2.4.1	Design Theory	3
	2.4.2	Function of Base Course and Subgrade	3
	2.4.3	Design Period	4
	2.4.4	Design Traffic	5
	2.4.5	Subgrade Properties and Strength	5
	2.4.6	Drainage of Subgrade	6
	2.5	Design Methods	6
	2.5.1	Flexible Pavement Design	6
	2.5.2	Rigid Pavement	9
	2.6	Overlay Design on Rigid Pavement	10
	2.7	Overlay Design on Existing Bituminous Pavement	11
	2.8	Design Standards for Structures	13
	2.9	Design Loads	14
	2.10	Durability Aspects for Structures	16
	2.11	Lighting	17
	2.12	Landscaping	17

Chap-ter No.	Section	Title	Page No.
3.		Design	1-30
	3.1	Design	1
	3.1.1	Geometric Design	1
	3.1.2	Horizontal Alignment	5
	3.1.3	Vertical Alignment	5
	3.2	Design Data	5
	3.2.1	Design CBR	6
	3.2.2	Design Traffic & Growth Factor	9
	3.2.3	Distribution Factor	10
	3.2.4	Vehicle Damage Factor	12
	3.2.5	Characteristic Deflection	13
	3.2.6	Design Life	13
	3.3	Choice of Pavement	13
	3.4	Design of Flexible Pavement	13
	3.5	Design of Rigid Pavement	15
	3.5.1	Provision of Dowel Bar & Tie Bar	16
	3.6	Design and Strengthening Overlays over the Existing Concrete Pavement Surface	17
	3.7	Design of Strengthening Overlays over the Existing Bituminous Pavement Surface	17
	3.8	Design of Paver Blocks	18
	3.8.1	Paver Blocks for Carriageway	19
	3.8.2	Paver Blocks for Footpath	19
	3.9	Junctions Improvement	20
	3.10	Parking	20
	3.11	Bus Bays/Bus Stops	20
	3.12	Embankment Design	20
	3.12.1	Slope Stability Analysis of Embankment	20
	3.12.2	Basis of Design Parameters	21
	3.12.3	Ground Improvement Scheme for Reinforced Earth (RE) Wall Portion	24
	3.13	Structural Design Elements	24
	3.14	Structural Design Philosophy	25
	3.14.1	Prestressed Concrete Structures	25
	3.14.2	Reinforced Concrete	26
	3.14.3	Crack Control	26
	3.14.4	Bearings	26
	3.14.5	Piers	26
	3.14.6	Abutments	26

Chap -ter No.	Section	Title	Page No.
	3.14.7	Foundations for ROBs	26
	3.14.8	Foundations for the River Over Bridges	27
	3.14.9	Reinforced Earth Retaining Walls	27
	3.15	Cross Drainage Works	28
	3.16	Design of Lighting	29
	3.16.1	Illumination	29
	3.16.2	Power Distribution	29
	3.16.3	Arrangement of Poles	30
	3.17	Landscaping Design	30
	3.18	Summary	30
4.		Life Cycle Cost Analysis	1-7
	4.1	Introduction	1
	4.1.1	Initial Construction Costs	1
	4.1.2	Maintenance Costs	1
	4.2	Life Cycle Cost Analysis	1
	4.2.1	Design Parameters	2
	4.2.2	Other Comparison Parameters	3
	4.3	Cost Estimate	4
	4.3.1	Flexible Pavement	4
	4.3.2	Rigid Pavement	5
	4.4	Construction and Maintenance – Investment Options	6
	4.4.1	Flexible Pavements	6
	4.4.2	Rigid Pavements	6
	4.5	Economic Analysis	7
	4.6	Conclusions	7
5.		Drainage Design	1-3
	5.1	General	1
	5.2	Data Collection	1
	5.3	Design Basis	1
	5.3.1	Surface Runoff Generated due to the rainfall	1
	5.3.2	Water Spilled from Fire Fighting	2
	5.3.3	Ground water which gets percolated	2
	5.3.4	Sizing of the Drain Section	2

Chap -ter No.	Section	Title	Page No.
6.		Traffic Management & Pedestrian Safety Measures	1-5
	6.1	General	1
	6.2	Traffic Control Devices	1
	6.2.1	Traffic Signs	1
	6.2.2	Road Markings	2
	6.2.3	Traffic Signals	3
	6.2.4	Signalization of Major Intersection	3
	6.3	Pedestrian Facility & safety Measures	4
	6.3.1	Footpath	5
	6.3.2	At Grade Crossing	5
	6.3.3	Grade Separated Crossing	5

LIST OF TABLES

Table No.	Title	Page No.
2.1	Geometric Design Standards	2
3.1	Proposed Lane Configuration	1
3.2	Comparative Field & laboratory CBR Values	6
3.3	Initial Commercial Traffic & Distribution Factors	10
3.4	Vehicle Damage Factor	12
3.5	Road Classification as per Traffic & CBR	14
3.6	Pavement Composition for different msa	14
3.7	Recommended pavement Composition	15
3.8	Design Parameter for Rigid Pavement	16
3.9	Overlay thickness on flexible pavement	18
3.10	Pavement Crust under Paver Block	19
3.11	Computation of FS of Friction arc 1 by Swedish Circle method.	21
3.12	Computation of FS of Friction arc 2 by Swedish Circle method.	22
3.13	List of CD structures	28
3.14	List of Roads proposed for Landscaping	30
4.1	Composition of Flexible Pavement	2
4.2	Composition of Flexible Overlay	2
4.3	Composition of Rigid Pavement	3
4.4	Initial Cost Estimate for Flexible Pavement (New)	4
4.5	Cost Estimate for Flexible Pavement Strengthening overlay (10 th & 20 th Year)	5
4.6	Cost estimate for Flexible Pavement renewal (Functional) overlays	5
4.7	Cost Estimate of Rigid Pavement	5
4.8	Cost Estimate for Joints seals	6
4.9	Cost Estimate Concrete Spalling & surface Textures	6
6.1	Junction Traffic Volume in Base Year	4

LIST OF FIGURES

Figure No.	Title	Page
2.1	Pavement Deflection results in Tensile and Compressive stresses in pavement structures	4
2.2	Flow Chart of Flexible Pavement Design for New Carriageway	9
2.3	Flow Chart of Overlay Design for Existing Carriageway	12
3.1-3.40	Typical Cross Sections for Project Roads	4
3.41	Slope Stability Analysis For Road No.10	23
3.42	Ground Improvement Scheme Under Ramp Portion	24

LIST OF ANNEXURES

Annexure No.	Title	Sheets
3.1	Details of Horizontal curves	8
3.2	Details of Vertical Curves	10
3.3	Traffic Survey Data & Traffic Growth Factor	
3.4	Analysis of Axle Load Survey	23
3.5	Analysis of Benkelman Beam Deflection	8
3.6	Traffic Calculation in msa	5
3.7	Design Calculation of Flexible Pavement	3
3.8	Design Calculation of Rigid Pavement	6
3.9	Design Of Street Lighting	2
3.10	Improvement Proposals for Roads in Nanded City	4
4.1	Life Cycle Cost Analysis	4
5.1	Typical Details of Storm Water Drain	1
